

At Your Service

Alexis Fire Equipment was founded in 1947 by Gene Morris when the initial facility employed four men and accommodated three to four units at a time. Gene recalls, "We began to grow rapidly and it was due only to a lot of dedication and pure hard work." Since Alexis opened its doors, we have taken pride in both the positive attitude of our employees and the quality of our work.

Since the beginning, the Alexis family has worked together for a common cause — to make equipment safer for the men and women who save lives every day. This goal remains true today under the guidance of Gene's son, Jeff Morris, president of Alexis Fire Equipment.

Doing Our Part.

We're not just known for our customized fire apparatus at Alexis Fire Equipment. We also have one of the largest on-site parts inventory in the state of Illinois and Iowa. No matter what you need, chances are we have it in stock or can get it to you quickly. Need a hard-to-find part? No problem – that's our specialty.

Our experienced parts team can help answer any questions you might have to help you get your apparatus up and running safely. Prompt service. Quality care. It's the way we do it at Alexis. Call us to find out more at 1-800-322-2284.

Mobile Service and Testing

Alexis also offers Mobile Service and Testing for your apparatus needs. Test price includes pump gearbox oil change and does not include service call charge. Many departments test with neighboring departments to share this fee. One copy of the test results will be provided at the time of test. A second typed copy of test results will be forwarded to you and will include any repair recommendations. Alexis is an authorized service center for all of the major pump manufacturers. Our mobile unit and service vehicle fleet also has a large parts inventory.

Customize Your Apparatus

Our Service Department is available to provide all your customized needs including custom hoses, custom drivelines, custom shelves and bins, and complete custom fabrication. Every fire department deserves a fire truck that is specially designed for them. And sometimes all you need is some custom updating to your current apparatus to make it completely your own. Call us today and find out what we can do to help update your fire apparatus and make sure your apparatus meets NFPA 1901 & 1911 Annex D Standards.
