CONTACT US TODAY

If you require additional information or would like information on service plans such as the Priority One Service plan, please contact us by phone or e-mail and request an informational packet for your department today.

IN CASE OF EMERGENCY

If your equipment requires emergency service please contact us at 1-800-322-2284 (ext. 50). If no one is available to take your call, follow the directions on our automated answering system and one of our service members will be paged.

DEMAND TO BE DIFFERENT.

109 East Broadway, Alexis IL 61412

SERVICE | SAFETY | LONGEVITY

Here For You 24/7.

Our service center offers EVT/ASE certified technicians, 24-hour emergency service, a large parts inventory, and efficient repair to all makes of fire apparatus. Additionally, in situations where service to an apparatus may take a prolonged period of time, Alexis has the capability to provide your department a loaner apparatus while your current apparatus is in service.

GREAT PEOPLE.

GREAT SERVICE.

Alexis handles major pump overhauls, pump and valve repairs, routine maintenance, body work, electrical repairs, aerial repair and maintenance, tank repair and replacement. Alexis specializes in the service and repair of all makes of apparatus.

In our facilities, at your department or on the scene, Alexis offers around-the-clock emergency service 365 days a year. Our large parts inventory supports quick turn around. Alexis is an authorized service center for all major pump manufacturers. When you need apparatus repair, call the service specialists you can depend on.

Safety First

It's not just about your truck.
It's about what's riding in it.
Protect your most valuable asset –
your lives and those you save by
making sure your apparatus is in
full working order.

At Your Service

The 14,000 square foot Service Department of Alexis is headed by Brian Dillbeck. With over thirty-five years experience, there aren't many apparatus repairs Brian hasn't tackled. His hands-on experience guarantees a repair job you can count on. "Many shops can't offer the kind of service we have," Dillbeck says. "For us, it's personal. We take a lot of pride in what we do. We will do a complete and thorough job and have the capabilities and experience to work on any make and model of fire truck."

Our factory-trained service personnel have attended OEM training seminars at Hale, Class One and Waterous and continue to maintain their EVT certifications. Our technicians have over 100 years combined experience and understand the importance of quality repair, fast response and close mechanic-client relationships. They take the time to fully explain what is in need of repair and answer any questions. In addition to repair, Alexis offers bumper-to-bumper maintenance and inspection, as well as ISO testing in accordance with the latest standards on all makes of pumps.

A Fully Bonded Company

Alexis Fire Equipment was founded in 1947 by Gene Morris when the initial facility employed four men and accommodated three to four units at a time. Gene recalls, "We began to grow rapidly and it was due only to a lot of dedication and pure hard work." Since Alexis opened its doors, we have taken pride in both the positive attitude of our employees and the quality of our work.

Since the beginning, the Alexis family has worked together for a common cause — to make equipment safer for the men and women who save lives every day. This goal remains true today under the guidance of Gene's son, Jeff Morris, president of Alexis Fire Equipment.

Vehicle Longevity

Proper and consistent maintenance extend the life and performance of your emergency equipment. To help you achieve this objective, we offer preventative maintenance programs performed by certified and experienced repair technicians. This service is available both on site and at our service facility.

- Chassis & Apparatus Body Inspection
- Engine Inspection and Maintenance
- Pump/Valve Inspection and Maintenance

Annual Preventative Maintenance has been proven to not only reduce major repair expenses and decrease vehicle down-time, but also increase the safety and reliability of your equipment and extend the life of your vehicle.

Mobile Service and Testing

Test price includes pump gearbox oil change and does not include service call charge. Many departments test with neighboring departments to share this fee. One copy of the test results will be provided at the time of test. A second typed copy of test results will be forwarded to you and will include any repair recommendations. Alexis is an authorized service center for all of the major pump manufacturers. Our mobile unit and service vehicle fleet also has a large parts inventory.
